SHRUBS

Pinky Bells® Lynn

Height: 3 - 4' glossy green and red foliage and a tidy habit that needs little care

Canyon Creek

Height: 4 - 5' new coppery-pink foliage changes to a soft yellow ending the season green

Funshine®

Height: 2 - 3' new glossy bright marmalade-orange foliage then fades to green

Kaleidoscope

Height: 3 - 4' variegated leaves of bright yellow with light green centers

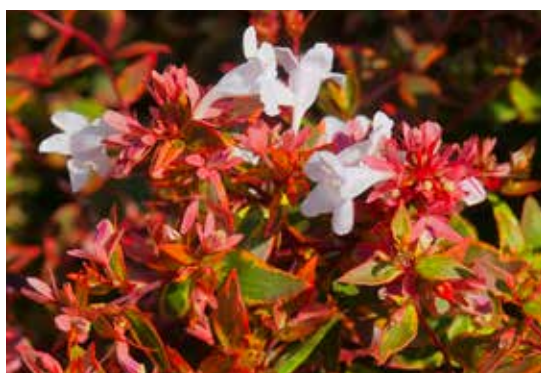

Little Richard

Height: 3 - 4' green leaves that turn purple-green and stay that way into winter.

Rose Creek

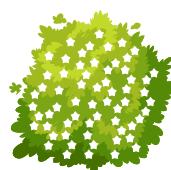

Height: 3 - 4' green leaves that turn purple in winter

Sunshine Daydream

Height: 3 - 4' one of the most compact variegated varieties with coppery-pink foliage

Abelia bloom in the spring and keep their leaves year-round so you'll always have something to show! They thrive in the sun, and need well drained soil.

Habit: Low Growing Bush Blooms: Spring - Fall

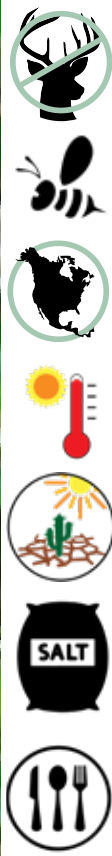

ZONE 6 - 9

ABELIA

ABELIA X GRANDIFLORA

ARONIA

Ground Hug™

Height: 8 - 14" high x 36" wide

Chokeberry Ground Hug™ is the ideal landscape ground cover, filling in difficult spaces such as parking lot beds, slopes, or anywhere mowing would be difficult or undesirable. This dwarf aronia naturally grows as a thick, dense mat, eliminating the need for weeding and mulching as well.

Glossy foliage, white spring flowers, dark purple berries in late summer, and autumn foliage in hues of brilliant orange-red make this native plant as showy as it is adaptable.

Low Scape Mound®

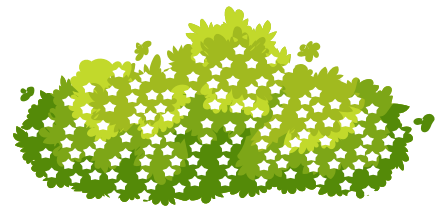

Height: 2'

Low Scape Mound® is an innovative dwarf selection that may be the closest thing yet to a perfect landscape plant. Ideal for low maintenance mass plantings; think of it as Rhus 'Gro Lo' with multi-season appeal.

Adaptable to most any soil, this versatile little black chokeberry offers dark glossy foliage, loads of white flowers in spring, black summer fruit, and intense red foliage in autumn.

Habit: Thick Low Growing Bush

Blooms: Spring

habit is upright, dense. Some
can be trained to tree-like form.**
See individual plant notes for
different forms

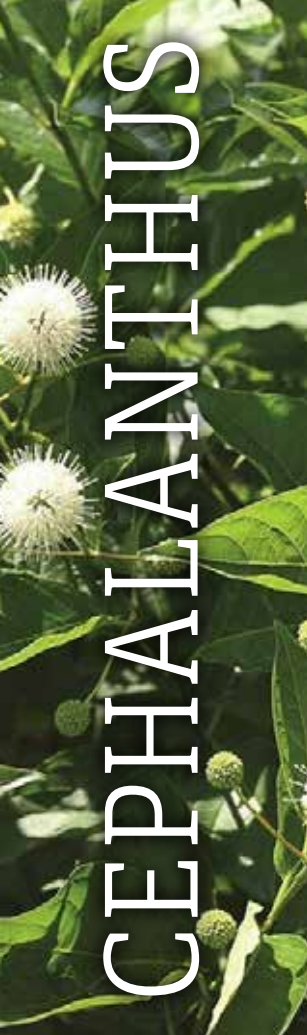

Blooms: Winter - Spring

ZONE 7 - 9

Camellias are a dense evergreen shrub considered the "Rose of Winter". Camellias are known for their exquisite blooms, deep green foliage and shapely forms. Flowering for weeks from fall into spring (depending on variety and climate), when the rest of the garden is asleep, making these the queens of the winter flowers.

CEPHALANTHUS

Sugar Shack

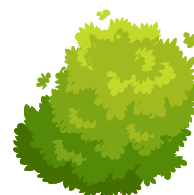

Height: 4'

Bog Plant, tolerates wet soils, dwarf, upright habit

Cephalanthus occidentalis, also known as, Buttonbush Sugar Shack®, is a dwarf variety of the native Buttonbush. Interesting looking fragrant white flowers followed by red fruits that persist into winter. Glossy green foliage turns burgundy in fall.

ZONE 4 - 10

Habit: dwarf, upright bush

Blooms: Summer

CEPHALANTHUS OCCIDENTALIS

CLETHRA ALNIFOLIA

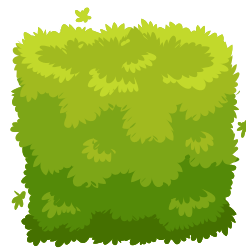

Bronze Beauty™

Height: 8 - 10' Compact, Heat Tolerant, Evergreen

ZONE 7 - 10

TERNSTROEMIA GYMNANTHERA 'CONTHERY'

Habit: compact, hedge or privacy screen

Cleyera Bronze Beauty™ makes a great privacy hedge or screen. Very attractive foliage that emerges deep bronze and turns green at maturity. An improved variety of Cleyera that has a uniform growth habit.

CLETHRA

CLEYERA

COTONEASTER

Little Dipper®

Height: 1 - 2' produces Berries, self-cleaning, dense, wonderful ground cover

Cotoneaster procumbens 'Gerald', also known as Cotoneaster Little Dipper® is a low growing shrub with white flowers in spring and red berries in late summer. It's dense, spreading habit make it a wonderful ground cover. Although it is a ground cover, it does not like to be walked on. Plant this low maintenance shrub in a full to part sun location that gets an average amount of water.

ZONE 5 - 8

Scarlet Leader

Height: 2 - 3' semi-evergreen low growing broadly spreading shrub with dense foliage

Cotoneaster salicifolius 'scarlet Leader' has white flowers in the spring, bright red berries in fall with reddish purple foliage in winter. Prefers Full sun.

ZONE 6 - 8

COTONEASTER PROCUMBENS | SALICIFOLIUS

CRYPTOMERIA

Globosa Nana

Height: 3 - 6' plant of merit, showy, evergreen, dense

Cryptomeria japonica Globosa Nana also know as Japanese Cedar, is a dwarf evergreen. Dense dome-shaped habit with rich blue-green awl-shaped foliage. Turns yellowish-green in the heat of summer, bronze to rusty red in winter. Slow growing and prefers moist, well-drained soils.

Habit: evergreen, compact, dome shape

ZONE 6 - 9

CRYPTOMERIA JAPONICA GLOBOSA NANA | JAPANESE CEDAR

Nikko

Height: 1 - 2' compact, showy double white flowers, rounded dwarf habit

Yuki Cherry Blossom®

Height: 1 - 2' small or miniature, fall interest

Deutzia gracilis 'Nikko' has an outstanding display of double white flowers in spring. Low growing shrub that is more compact than other of the species. Bright green leaves on arching branches turn burgundy in fall.

Deutzia Yuki Cherry Blossom® is the first ever low growing, pink blooming deutzia. Purple fall foliage.

**Habit: compact evergreen
shrub, produces berries**

ZONE 6 - 9

Cool Glow™ Peach

Lemon Lime

Durable, and compact, these are perfect for landscape, foundations, or mass planting. Tiny whitish flowers with yellow anthers appear in late spring in loose, erect, terminal clusters. Flowers are followed by sprays of spherical, two-seeded, red berries which persist from fall to spring, providing winter interest.

Leaves and berries are toxic to livestock and other domestic animals. Berries contain cyanide and when consumed in quantity can be toxic to birds.

NERIUM

NERIUM | OLEANDER

Calypso

Height: 10 - 15' bushy, rounded vase-shaped habit, small tree

Pink

Height: 10 - 12' evergreen leathery foliage, rounded to vase-shape

White

Height: 10 - 12' fast growing, evergreen, shrub/small tree, rounded

ZONE 8 - 11

Nerium or Oleander is a tough, sun loving, long-blooming, shrub or small tree. It has narrow glossy leather-like dark-green foliage accented with a profusion of fragrant bright flowers appearing through summer. Long loved for its durability, Nerium is well-suited as an accent hedge, screen, mass planting, or small tree. May need winter protection. Prefers well drained to xeric soils.

All parts of this plant contain a milky sap that is poisonous if ingested so caution should be used when pruning or working with this species. Toxic to animals as well.

ZONE 6 - 9

Blooms white, inconspicuous flowers in the late fall, highly aromatic and pungently sweet

OSMANTHUS

Osmanthus, also known as Tea Olive or False Holly, is an upright and mounding shrub with dark evergreen leaves. Fast, vigorous growing makes them excellent for use as a specimen or screen planting. Fragrant fall blooms that are white, 4-lobed and less than an inch in diameter.

Habit: compact evergreen shrub

OSMANTHUS | TEA OLIVE

PHILADELPHUS

Illuminati Tower™

Height: 3 - 4' upright, narrow, columnar habit, fragrant

Philadelphus coronarius Illuminati Tower™, also known as Mock-Orange, has a narrow, columnar habit and unique four-sided "tower" effect. Early summer brings hundreds of fragrant white flowers along the dramatically upright branches, each nestled within handsome dark green foliage.

ZONE 4 - 7

Habit: upright deciduous bush

Blooms: Spring - Summer

PHILADELPHUS CORONARIUS | MOCK-ORANGE

PIERIS

Pieris Interstella®

Height: 3 - 4' evergreen, lantern-like blooms, mounded habit

Interstella® Pieris japonica (or Lily of the valley shrub) is one of the earliest blooming plants, starting its display of beautiful, bell-like, ruby-colored flowers before the calendar says spring. And there are hundreds of them, dangling delicately from fine stems against a gorgeous evergreen backdrop. The flowers persist for a very long time - two months or more - and when they are done, the plant begins a dazzling display of star-like bright red new growth. This is possibly the most shade tolerant flowering shrub, blooming well even in very low light conditions.

ZONE 5 - 8

Habit: mounding evergreen bush

Blooms: Spring - Summer

PIERIS JAPONICA | LILY OF THE VALLEY SHRUB

Glynn St. Mary

Height: 5 - 6' compact, rounded, mounding habit, needs winter protection below 20° F

VEGETABLES

ZONE 4 - 9

Fragaria Berried Treasure® Red

Height: 12 - 16" Strawberries

Fragaria Berried Treasure® Red, also known as Strawberries, this wonderful plant is both highly ornamental and it produces tasty fruit on ever-bearing plants. The semi-double flowers are gorgeous and lip-smacking sweet strawberries show off together all summer. Planting in a container will show off the fruit to best effect, but it can also be grown in gardens. Short runners can develop over time, which may add a trailing element to the plant. These runners can be trimmed back, if you prefer to do so or can be left as is. The mounding plants are just the right size for your patio pots or hanging baskets. They will flower and produce fruit the season they are planted if you buy plants or start seeds indoors, which means the plant can be grown as an annual. However, they are also quite hardy and will be perennial in zones 4-9.

ZONE 10 - 11

Pepper Fire Away™ Hot and Heavy

Height: 16 - 24" Hot Peppers

Pepper Fire Away™ Hot and Heavy is a hot pepper that works well in landscapes and containers. It may need trellising to maintain upright habit. Fruit transitions from green to orange to red, with multiple colors represented on the plant at the same time. Fruits can be harvested when they begin to show good color and are fully ripe when solid red. Taste is pleasing if picked before full maturity. If you are growing this plant in a container, a 12" diameter (3 gallon volume) is the minimum necessary size. The ideal size would be a 14" to 18" (5-7 gallon) container.

ZONE 10 - 11

Tempting Tomatoes® Goodhearted®

Height: 8 - 12" Small Tomatoes

Tomato Tempting Tomatoes® Goodhearted® is a compact, cherry-size tomato that has been hailed as a breakthrough. It is perfectly sized for growing in a container on your patio. For its size, it produces tons of ripe tomatoes. Tomatoes present prominently. Juicy fruits have a tender skin and perfect sweet to acid balance, with a Brix value of about 9. The somewhat heart-shaped tomatoes are fun and interesting and look especially cool when sliced in half, which shows off the heart-shape to best effect. The tomato shape helps this veggie be ornamental as well as yummy. These plants will produce tomatoes for an extended period of time and thrive in heat and humidity. Fruit ripens in about 65 to 72 days. The plant is semi-determinate in the North and determinate in the South. Support should not be needed.

ZONE 10 - 11

Tempting Tomatoes™ 'Garden Treasure'

Height: 34 - 48" Large Tomatoes

Tomato Tempting Tomatoes™ 'Garden Treasure' is an indeterminate, slicer type tomato that has been hailed as a breakthrough. It was developed to have true heirloom taste, with modern disease resistance and high yield of large fruit. It performs well in heat and humidity. It has a smooth, balanced flavor and is delicious in salads and sauces. This tomato will produce fruit for an extended period of time. Fruit ripens in about 70-75 days from transplant. If you grow them from seed, the first mature fruit will take 91 to 103 days.

VINES

Ficus Pumila

Height: 10 - 15'

ZONE 9 - 11

Ficus pumila, also known as Creeping Fig, this vigorous growing vine has green leaves that clings firmly to any surface. Easy to grow solution to cover walls, pillars, arbors and fences. Grows best in full to partial sun. Moderately salt tolerant. Don't forget, this Creeping fig can be adapted as a houseplant!

FICUS

FICUS PUMILA | CREEPING FIG

ZONE 4 - 9

Lonicera per. 'Scentsation'

Height: 8 - 10'

Lonicera periclymenum 'Scentsation', also known as Honeysuckle Scentsation has clean foliage that is covered with yellow trumpet-shaped flowers all summer. Hummingbirds love the blooms. Twines up any fence or trellis. Plants produce an abundance of flowers in a full sun location.

ZONE 4 - 10

semp. 'Leo'

Height: 8 - 15'

Lonicera sempervirens 'Leo', also known as Honeysuckle Leo. Hummingbirds flock to the beautiful orange-red flowers. The trumpet shaped blooms cover this vine as it twines up a fence or trellis. Plants produce an abundance of flowers in a full sun location. Moderately salt tolerant.

LONICERA

Yunique™ White

Height: 12 - 16" compact, upright habit, low maintenance, cut flowers

Although Astilbe's are easy to grow, they do require a lot of water. Increase your watering as the foliage emerges and the plumes mature. Beautiful both in the garden and in containers!

Blooms: Spring

Silky Deep Red

Height: 28" selected for vibrant color and larger flower clusters than the species

Silky Gold

Height: 28" rounded habit, great cut flowers, large vibrant flowers

Asclepias cur. also known as Tropical Milkweed, has captured the heart of butterfly gardeners. Selected for more vibrant color and slightly larger flower clusters than the species. Showy, season-long blooms provide lasting color and a non-stop resource for monarchs. To provide the best benefit to monarchs, plant tropical milkweed alongside local varieties for a diverse offering of nectar and resources. A good plant mixed with other tall perennials and the long stems are excellent for cutting. Cut back in the fall after all caterpillars are gone (often left leafless by them) but be wary of the milky sap, which can cause irritation and injury to eyes and is poisonous if ingested.

ZONE 8 - 11

ASCLEPIAS CUR. | MILKWEED

A
ASCLEPIAS

Campfire® Flame

Height: 8 - 14" mounded habit, long blooming, self-cleaning

Bidens Campfire® Flame is a vigorous annual with striking scarlet and yellow flowers in the summer months and muted orange petals in early spring and fall. Campfire® Flame is self-cleaning, which means no dead-heading is necessary. This plant can be trimmed back at anytime if you feel it is outgrowing its space. Great to use as a border plant, in a container, or planted in mass in the landscape.

PENTAS

Pentas, also known as Egyptian Star Flower, is a lovely annual that features extra-large clusters of flowers on mounding green foliage. These heat tolerant plants bring on the pollinators and bloom nonstop all summer without any deadheading. Pentas is best grown in good, moist soil, but it can tolerate poorer soils as well. They are quite heat tolerant. An application of controlled release fertilizer at planting should be sufficient, but an additional application in mid-summer will help the plants thrive into Fall.

ZONE 4 - 9

Perovskia, also known as Russian Sage, is a lovely perennial that has lacy silver foliage with lavender-blue summer flower spikes. With its fragrant foliage, you will invite hummingbirds and bees to your garden while keeping deer and rabbits at bay. We recommend planting in dry, well drained soils and water occasionally until established or in extreme heat. In late winter, cut back the stems almost to the ground for early spring new growth.
